EDUCATION

Calcutta Institute of Engineering and Management (MAKAUT)

2019 – 2023

Bachelor of Technology in Information Technology – Kolkata, West Bengal

EXPERIENCE

Capgemini Technology Services

Sep 2024 – Present

Software Engineer — Bengaluru, India

- Engaged in Java, React, and Google Cloud Platform based internal projects and training assignments.
- Designed and developed a CRUD-based Employee Management System with REST APIs, JWT authentication, and MySQL integration.
- Built a mini E-Commerce portal with Spring Boot backend and Angular frontend, implementing product catalog, shopping cart, and checkout workflow.
- Deployed applications on Google Cloud Platform and implemented responsive UI using Angular, HTML, CSS, and Bootstrap.

Capgemini Technology Services

Sep 2024 – Present

Data Analyst — Bengaluru, India

- Performed end-to-end data analysis on 7,000+ customer records using Python (Pandas, NumPy) and SQL to identify purchase patterns, churn signals, revenue trends, and customer lifetime value.
- Cleaned, transformed, and validated large datasets using Pandas and SQL, ensuring data quality and consistency for downstream reporting and modelling.
- Built customer segmentation and churn prediction models using Scikit-learn (Random Forest, Logistic Regression) with class balancing techniques, achieving strong ROC-AUC performance.
- Applied SHAP values to interpret machine learning predictions and communicate key churn drivers to non-technical stakeholders.
- Designed 5+ interactive Power BI dashboards to visualize KPIs, churn trends, retention metrics, and customer segments, enabling real-time data-driven decisions.
- Created detailed visual reports using Matplotlib and Seaborn covering survival analysis (Kaplan–Meier, Cox PH), cohort trends, and feature importance.
- Automated data validation and reconciliation processes, reducing manual reporting effort and improving turnaround time.

Telaverge Communications

Jul 2024 – Sep 2024

Software Engineer Intern — Bengaluru, India

- Led the development of a React-based application to digitalize manual verification processes, resulting in a 50% reduction in processing time.
- Performed RESTful API testing and request/response validation using Azure DevOps for API integration and testing.
- Collaborated with cross-functional teams to gather requirements and ensure seamless integration of the digital verification system with existing infrastructure.

PROJECTS

Customer Trends Data Analysis | Python, SQL, Power BI, Scikit-learn, Matplotlib, Seaborn

[GitHub](#)

- Analyzed 7,000+ customer records using Python and SQL to uncover purchase patterns, churn drivers, customer segments, and lifetime value trends.
- Built machine learning models (Random Forest, Logistic Regression) with Scikit-learn and class balancing; applied SHAP for explainability.
- Designed interactive Power BI dashboards and Matplotlib/Seaborn visual reports to communicate insights and support retention strategies.

- Automated data cleaning and transformation pipelines, ensuring data quality and consistency across the analysis workflow.

Full-Stack eLMS Application | React, Node.js, Express, PostgreSQL, JWT

- Developed a full-stack e-Learning Management System with role-based access for Student, Mentor, and Admin roles.
- Built RESTful APIs with Node.js/Express and PostgreSQL, implementing JWT authentication, course management, and progress tracking.
- Designed a responsive React frontend with dynamic routing, dashboards, and real-time data rendering.

TECHNICAL SKILLS

Programming & Scripting:	Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, Java, JavaScript, HTML, CSS
Data Analysis & ML:	Scikit-learn, Data Cleaning & Transformation, Customer Segmentation, Churn Prediction, SHAP, Statistical Analysis
Web Development:	React, Angular, Spring Boot, Node.js, Express, REST APIs, JWT, Bootstrap
Data Visualization:	Power BI, Matplotlib, Seaborn, Jupyter Notebooks
Databases:	MySQL, PostgreSQL, SQL Server
Cloud Platforms:	Google Cloud Platform (GCP), Microsoft Azure
Tools & Methods:	Azure DevOps, Git, GitHub, Agile (Scrum)
CERTIFICATIONS	

- Java Full Stack Developer — JSpiders, Bengaluru
- Google Cloud Certified Professional Cloud Developer — Google
- Microsoft Azure Fundamentals (AZ-900) — Microsoft
