EDUCATION

Calcutta Institute of Engineering and Management (MAKAUT)

08/2019 – 07/2023

Bachelor of Technology in Information Technology (CGPA 9.05) – Kolkata, India

EXPERIENCE

Capgemini Technology Services

09/2024 – Present

Software Engineer – Bengaluru, India

- Engineered and owned multiple React.js modules end-to-end — from component architecture and state management (Context API, custom hooks) to API integration and performance optimization — reducing page load time by ~ 30% through lazy loading and memoization strategies.
- Developed and maintained Java-based microservices on the backend, writing clean, testable business logic with RESTful API contracts consumed by React front-end, ensuring seamless full-stack feature delivery across sprint cycles.
- Led the migration of legacy UI components to a reusable React component library, enforcing SOLID principles and design patterns across the codebase, which significantly reduced duplication and improved maintainability for the team.
- Collaborated with architects and cross-functional stakeholders to define technical solutions, participated in code reviews, maintained CI/CD pipelines via Azure DevOps (VSTS), and drove alignment between functional specifications and delivered output.
- Leveraged Python and SQL to automate internal reporting workflows and built Power BI dashboards tracking critical KPIs, enabling data-driven decisions for business and operations teams.

Telaverge Communications

07/2024 – 09/2024

Software Engineer Intern – Bengaluru, India

- Led the development of a React-based application to digitalize manual verification processes, resulting in a 50% reduction in processing time.
- Performed RESTful API testing and request/response validation using Azure DevOps for API integration and testing.
- Collaborated with cross-functional teams to gather requirements and ensure seamless integration of the digital verification system with existing infrastructure.

PROJECTS

eLearning Management System (eLMS) | React, Node.js, Express, PostgreSQL 🚀

- Built a full-stack eLMS with role-based access control (Student, Mentor, Admin) using React for the frontend and Node.js/Express REST API backend with JWT authentication.
- Implemented dynamic routing, protected routes, and responsive UI components; resolved complex authentication flows and UI state management challenges.

TECHNICAL SKILLS

Frontend: React.js (Hooks, Context API, React Router), HTML5, CSS3, Bootstrap, Angular (basic)

Backend & Databases: Node.js, Express.js, RESTful APIs, PostgreSQL, MySQL,

Programming: Core Java, Python, TypeScript, JavaScript (ES6+), SQL

DevOps & Tools: Git, Linux, VSTS (Azure DevOps), CI/CD basics, Agile (Scrum), SOLID principles, Design Patterns

Cloud & Other: Microsoft Azure (certified), Google Professional Cloud Developer(certified), AWS (basic), Unit Testing basics

Fundamentals: DSA, RDBMS (SQL Server), Problem Solving

CERTIFICATIONS

- Google Cloud Certification – Google
- Microsoft Azure Certification – Microsoft
- Full Stack Java Developer Training Certification – JSpider, Bangalore

EXTRACURRICULAR

- Active participant in college-level coding competitions and hackathons.
- Mentored junior students on academic projects involving web development and data analysis.
- Placement Coordinator – 2023 Batch

DECLARATION

I hereby declare that all the information given above is true and correct to the best of my knowledge.

Place: Bengaluru, Karnataka

Date: 26/06/2026
